

Why should your organization participate in the Energy Services Coalition's 2015 Market Transformation Conference?

ESPC Policy Intel

The 2015 Outlook from Public and Private Sector Leaders

In-Depth Panel Discussions

Public and Private Experts Presenting ESPC Solutions

Leveraged Networking and Partnering

Virtually every ESPC State Program Manager and ESC Chapter Assembled in One Place

ABOUT ENERGY SERVICES COALITION

The Energy Services Coalition (ESC) is a national 501 c3 non-profit organization whose mission is to promote the benefits, provide education, and serve as an advocate for the widespread use of energy performance contracting in public and private facilities.

Hand-in-hand, public and private sector members, the organization facilitates the outreach of programs, concepts, and ideas that support the growth of the performance contracting industry. Our membership is comprised of more than 350 energy experts from nearly every state in the nation representing both industry and the public sector.

2015 MARKET TRANSFORMATION CONFERENCE

The Westin Charlotte, August 31 – September 2, 2015

If you are in a position of delivering the benefits of ESPC, this conference is designed for you. . .

The ESC is the nation's only public-private partnership organization dedicated to accelerating the broader use and acceptance of Energy Savings Performance Contracting at the state and local level. Our annual Market Transformation Conference offers invaluable networking with a multi-disciplinary assembly of private and public sector professionals all focused on expanding energy savings performance contracting market.

The conference also facilitates the interaction between ESC State Chapters to foster the cross-pollination of ideas to help to grow the overall market for the benefit of individuals, ESCOs, and state and local government.

The conference agenda covers the ongoing programs and activities of ESC Chapters and State Energy Offices nationwide, as well as related topics such as financing mechanisms, innovative projects and new technologies.
