

Leveraging your data for ESPC success

Energy Services Coalition

4th Annual Market Transformation Conference

Elizabeth Stuart
Lawrence Berkeley National Laboratory
September 1, 2015

Energy Efficiency & Renewable Energy

Your Project Data is Valuable!

- EPC data can be gold mine for both agencies and ESCOs
- Critical for measuring project and program performance
- Critical for reporting up the chain, down the chain and out to stakeholders and the public
- Necessary for telling your ESPC success story (agency or ESCO), overcome skepticism, educate your audiences

Maximizing your Data's Value

- 1. Consistency key to making your data useful
 - Consistent data collection processes
 - Consistent data types and format = strong database
- 2. Ready access key to getting your story out
- 3. Institutionalization critical for maximizing/ retaining value over time
- 4. Easy-to-use tools important for all of the above

Data Tool: eProject Builder (ePB)

- FREE web-based system for housing and leveraging ESPC data for the life of the contract (up to 25 years)
- Developed/maintained by LBNL for U.S. DOE
- Enables agencies and ESCOs to securely and quickly:
 - Develop project scenarios with Excel-based template
 - Upload, access and track ESPC project information;
 - Generate financial schedules and data for analysis and reporting;
 - Benchmark new projects against historical project performance data.

Components and Access

ePB system comprises two components:

- 1. Excel-based data template -- ESCO uses to input data, develop scenarios, and upload data to the online database
- 2. Online system where project data is uploaded, accessed and tracked

Access:

- Default access: one customer/one ESCO per project
- Two-step log-in like other high-security sites

Inputs

- Data template (awarded project data):
 - Contact and identifier information
 - Financial, e.g., interest rate, contract type, payment timing
 - ECM pricing, baseline, savings and guarantee
 - Performance period payments/incentives and costs
- M&V module
 - Adjusted baseline
 - Verified savings at ECM and project level
 - Lost savings opportunity (caused by ESCO or agency)

Inputs: Excel-based Data Template

Outputs

- Awarded project data:
 - Online summary of projects
 - Financial schedules (pdf or html)
 - Data download (.csv)
- Post-installation and M&V reports:
 - M&V summary report (pdf or html)
 - Project dashboard will display multi-year performance to date

Total Implementation & Performance Period		Total Guaranteed Cost Savings (b+e)	Total Payments (c+f)		
		\$7,378,885	\$7,275,864		

IMPORTANT INFORMATION:

- (1) Guaranteed % of estimated savings is share of project estimated savings that ESCO is guaranteeing.
- (2) The guaranteed annual cost savings are based on the general description of M&V plan proposed for the project.
- (3) The total of annual payments represents the contract price and should be supported by information submitted.
- (4) If applicable, prior to the performance period, implementation period payments and energy savings are one-time amounts only.
- (5) If applicable, the proposed guaranteed cost savings during the implementation and performance periods must exceed the payments.
- (6) Escalation rates (see Annual Escalation Rates) applied to initial estimated annual cost savings in column (d).

ePB: Making Your Data Powerful

- CONSISTENCY: standardized data collection and financial schedules across ESCOs and across markets (federal, state, local, schools, etc.)
- ACCESSIBILITY: Secure centralized online database with permissions assigned by customer and ESCO
- ACCESSBILITY: Ready access to portfolio of project data for multiple uses
- TRANSPARENCY: Increased transparency, customer ownership and stakeholder confidence
- MARKET KNOWLEDGE: Benchmarking provides access to statistics on historic project data

About

Benchmarking

ePB Status

- Projects in the system:
 - ~320 projects across MUSH and federal market sectors
 - NV, VA, GA and KY, cities and universities
 - NV first state to require ePB for all its ESCOs
 - FEMP: new and legacy projects

Future:

- M&V module, dashboard, document upload (fall 2015)
- Exploring: ESCO project registry for Clean Power Plan

Accessing ePB

LEARN and **EXPLORE** on the <u>training site</u>:

https://epb-test.lbl.gov

Extra Slides

Project Entry Workflow

Typical project entry workflow:

- Customer and ESCO register for ePB accounts
- Customer initiates project online; provides ESCO contact email
- System notifies the ESCO that the new project is available
- ESCO downloads data template from site; inputs project data into the template
- ESCO uploads completed data template to ePB site
- When project is at award stage, ESCO <u>submits</u> uploaded data template online for customer approval
- Customer reviews project data via output schedule; if project data is deemed final, customer <u>approves</u> project and it is archived in ePB
- Customer can "unlock" project for revisions (e.g., mods)
